AutoStack 3

FULLY SELF-CONTAINED AUTOMATIC ROLL HARVESTER

Built by listening to the experts who matter most—our customers—the Trebro AutoStack 3 redefines high-production harvesting. This machine combines operator comfort, proven reliability, and forward-thinking innovation to outperform every other harvester on the market. The result? Maximum output, superior sod quality, less downtime, and faster ROI. The AutoStack 3 works harder so your operation runs smarter.

SPECIFICATIONS

Width of Cut: Two 24" cutting heads (2 X .61m)

Length of Cut: Electronically variable up to 81" (2.06m)

Thickness of Cut: Hydraulically adjusted

Pallet Size: 48" X 48" single-faced (1.22m X 1.22m)

Cutting Knife: One piece with fingers

Steering: Articulated with Auto Steer

Weight: 28,000 lbs. (12,701 kg)

Width: 11', 10"

Length: 35', 5"

Height: 10', 2"

Tires: 54" X 31" high flotation (1.37m X .79m)

Horsepower: 140 HP John Deere

Transmission: Infinitely variable hydrostatic drive

Drivetrain: Planetary with hydraulic wheel motors

Traction Control: Electronic anti-spin

OPTIONS & UPGRADES

- Palletless Forks Pallet lifter for double-sided pallets
- Powered Rollup system
- Hook Box Stacker
- BKT Tires
- Double trip gate ladder system

Updated powered rollup system with on-the-go electronic flap positioning.

About the AS3

Machine & Harvesting Features

- 90° positioning puts the driver in the best & most comfortable position for harvesting
- Twin 24-inch floating heads with individually adjustable down pressure for improved sod quality
- Easy blade changing with cutting heads in the raised position
- Articulated steering for outstanding maneuverability, even in smaller fields
- Dual auto steering allows harvesting in both directions
- High-flotation tires produce a light footprint, minimizing marking & compaction
- Improved powered roll-up system with on-the-go adjustable flap positioning
- Updated roll-up system is easy on turf & produces consistent, tight rolls
- Stacker rotation uses a durable, low-maintenance rotary actuator
- Improved weight distribution
- Mechanically synchronized vertical movement of forks & injector
- All-wheel drive with electronic anti-spin control
- Deluxe cab featuring joystick controls with large displays
- Curved glass front & rear windows for excellent visibility
- New hydraulic depth control that is simple & precise

HOOK BOX STACKER

Stacking, Controls & Power

- Improved accumulator scrap dump for on-the-fly scrapping of bad rolls
- Front-to-back stacker with 88 spears gently transfers 10 rolls at a time to the pallet
- Simplified stacker uses hydraulic cylinders to activate pickup spears
- Easily configurable to stack flat-top or pyramid pallets of turf up to 9 layers high
- On-the-go automatic pallet injector with 20-pallet capacity & hydraulic doors
- Industry-leading adjustable pickup & delivery pressure for tight, stable pallets
- Proven Plus 1 Control System
- Optional telematics remote access system
- Onboard troubleshooting available from the operator's screen
- Powered by a John Deere 140 HP diesel engine
