TREBRO-TSS

FULLY SELF-CONTAINED AUTOMATIC SLAB HARVESTER

The Trebro-TSS is built for steady slab production with simple, operator-friendly controls. Clear sightlines and an easy harvesting flow keep passes clean and stacks consistent, while low daily maintenance helps crews stay on schedule. Configure it to your fields and let the TSS handle the long days without the headaches.

SPECIFICATIONS

Width of Cut: 21" (.53 m) OR 23" (.58 m) OR 24" (.61 m)

Length of Cut: 16" (.40 m) or 24" (.61 m) or 48" (1.22 m)

Thickness of Cut: On-the-go hydraulic adjustment

Cutting Knife: One piece with fingers

Steering: Ultra-Steer Automatic, front pedestal 170° arc

Weight: 26,600 lbs (12,065 kg)

Length: 31' 10" (9.70 m)

Width: 11' 8" (3.55 m)

Height: 10' 5" (3.17 m)

Tires: 700-40-22.5 High Floatation Terra

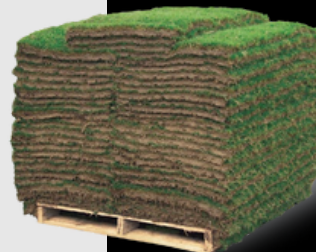

Horsepower: 140 HP John Deere

Drivetrain: Planetary with hydraulic wheel motors

All-Wheel Drive: Electronic anti-spin

Excellent visibility for night harvesting with stadium lighting

About the TSS

The TSS automatic stacking slab harvester couples proven Trebro engineering with updated controls and ergonomics to deliver consistent slab production in a wide range of field conditions. A 140-hp John Deere engine with hydrostatic drive provides smooth, dependable power, and the 90° rotating cab gives the operator clear sightlines across cutting and stacking.

A choice of 21", 23", or 24" cutting widths lets you match the machine to your market. The floating cutting head with dual adjustable down-pressure maintains a clean, uniform cut as conditions change. A cross-conveyor scrap dump keeps the next pass clear, or accumulates scrap for end-of-field disposal. Stacks are kept neat and stable with on-the-fly pallet exchange, and the pallet injector carries 20 empty pallets; an optional pallet lifter is available for double-sided pallets.

SPEC YOUR NEW TSS

Machine & Harvesting Features

- 140-hp John Deere engine + hydrostatic drive
- 90° rotating cab for harvest view
- Floating cutting head w/ dual down-pressure
- Cross-conveyor scrap management
- On-the-fly pallet exchange
- Pallet injector (20 pallets)
- Cross-conveyor scrap dump puts scrap out of the way
- Cab rotates 90° into harvesting position for excellent visibility and operator comfort
- Updated "bump" system for better reliability

OPTIONS & UPGRADES

- Cutting widths: 21" . 23" . 24"
- Pallet lifter for double-sided pallets
- Spare parts package
- Trebro Telematics with Remote Support Services
- High-flotation tire sets
- Auto-steer assist
- Diagnostic interface / control updates
- Lighting & comfort package (seat + visibility)
- **BKT Tires**
- **Heavy-Duty (Montazuma) Toolbox**
